2023 SPONSORSHIP OPPORTUNITIES
American Rocketry Challenge
Since 2002, the American Rocketry Challenge, the world’s largest student rocket competition, has engaged nearly 90,000 middle and high school students in model rocketry.

The annual challenge invites students to design, build, and fly rockets to exacting requirements and gain hands-on experience solving engineering problems.

The program has launched countless careers in aerospace and defense, and its alumni are helping to engineer the vehicles that will take us back to the moon, and, one day, on to Mars.

“The American Rocketry Challenge will forever be one of the most defining experiences of my life.”

Ian F.
